UI/UX EXPERIMENT – Prototype with Familiar and Unfamiliar Navigation Elements

Aim

To design a shopping mobile application prototype and evaluate how users understand familiar and unfamiliar navigation elements.

Screen 1 – Login Page

• Illustration purpose not obvious for some first-time users

Possibly Unfamiliar Elements:

• Login button – standard sign in action

Familiar Icons:

Contains a login button and illustration. All users easily recognized login action. Result: Very easy to use.

Screen 2 – Shopping Category Page

• Card style layout – users unsure to scroll or tap

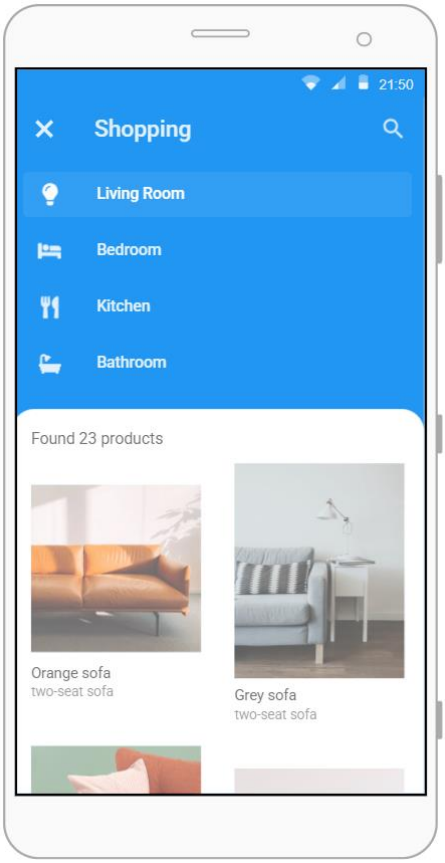
Possibly Unfamiliar Elements:

• Close (X) icon – exit page

• Search icon – find products

• Category icons – navigation sections

Familiar Icons:



Includes close icon, search icon and category navigation. Regular users understood quickly while beginners took some time.

Screen 3 – Product Details (Bed)

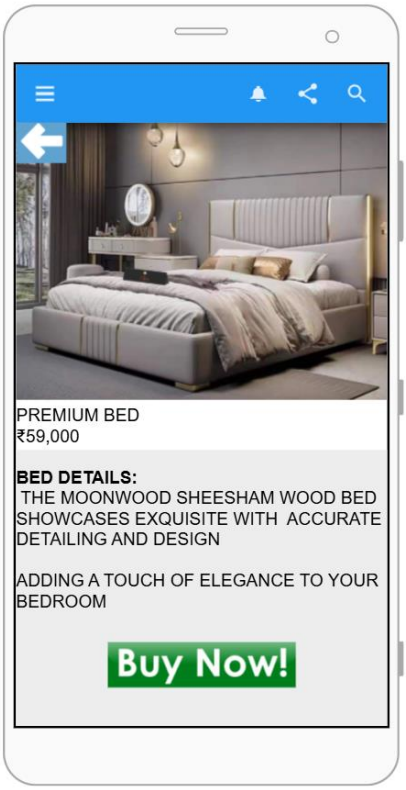
• Large image clickable area not clearly indicated

Possibly Unfamiliar Elements:

• Back arrow – previous page

• Buy Now button – purchase action

Familiar Icons:



Back arrow and Buy Now button clearly guided the user. Highly intuitive interaction.

Screen 4 – Product Details (Sofa)

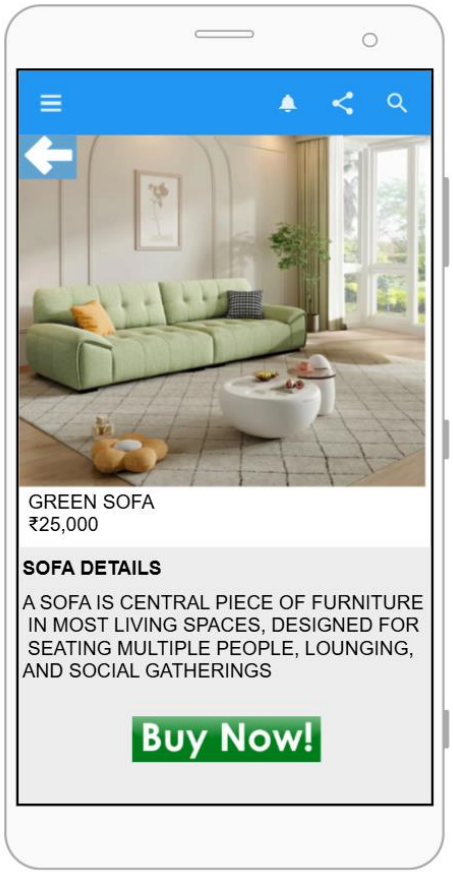
• Users unsure if description expandable

Possibly Unfamiliar Elements:

• Back arrow – navigation

• Buy Now – purchase

Familiar Icons:



Users compared product details and proceeded with purchase successfully.

Screen 5 – Order Confirmation Page

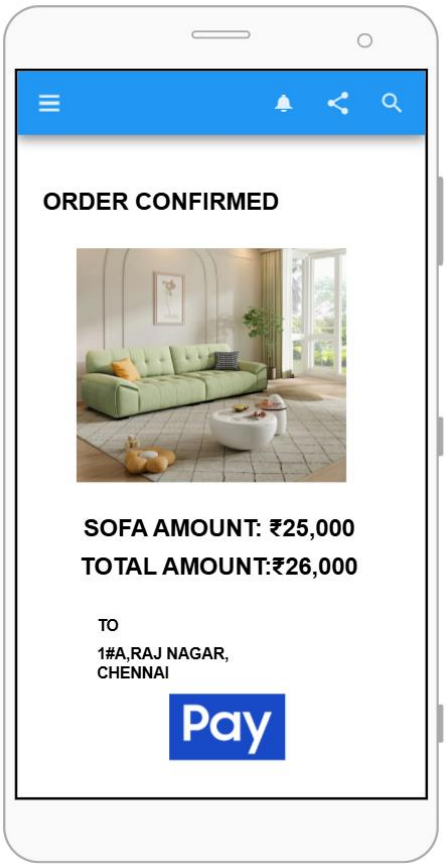
• Address editing option not clearly visible

Possibly Unfamiliar Elements:

• Price breakdown – billing info

• Pay button – payment step

Familiar Icons:



Displays amount, address and Pay button. Users identified payment step without help.

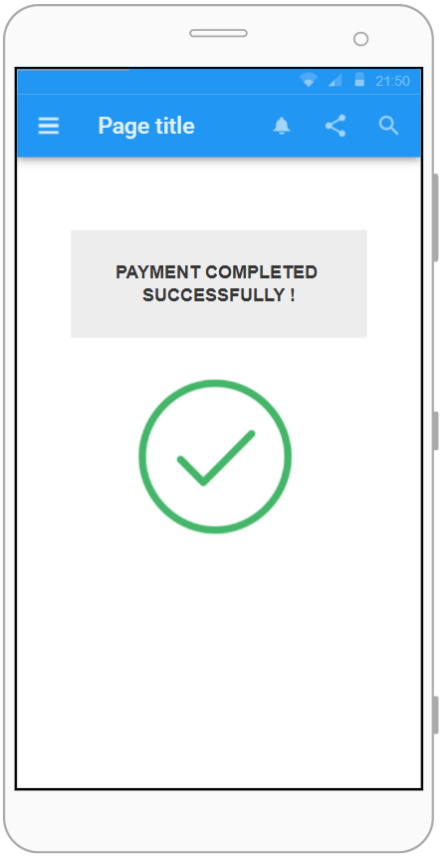
Screen 6 – Payment Success Page

• No navigation hint after success screen

Possibly Unfamiliar Elements:

• Tick mark – success confirmation

Familiar Icons:



Tick mark and success message confirmed transaction completion.

User Testing Analysis

Students: Very easy | Regular users: Easy | First-time users: Moderate difficulty

Conclusion

Familiar icons improved usability and allowed users to complete tasks quickly. Standard UI patterns enhance user experience.

Familiar Icons Used

- Login button – standard authentication action
- Back arrow – navigation to previous page
- Search icon – product search
- Close (X) icon – exit page
- Buy Now button – purchase action
- Pay button – payment confirmation
- Success tick mark – transaction completion

Possibly Unfamiliar Elements

- Category card layout – users unsure whether to scroll or tap

- Product description emphasis – some users ignored details
- Order summary format – beginners needed time to understand total calculation
