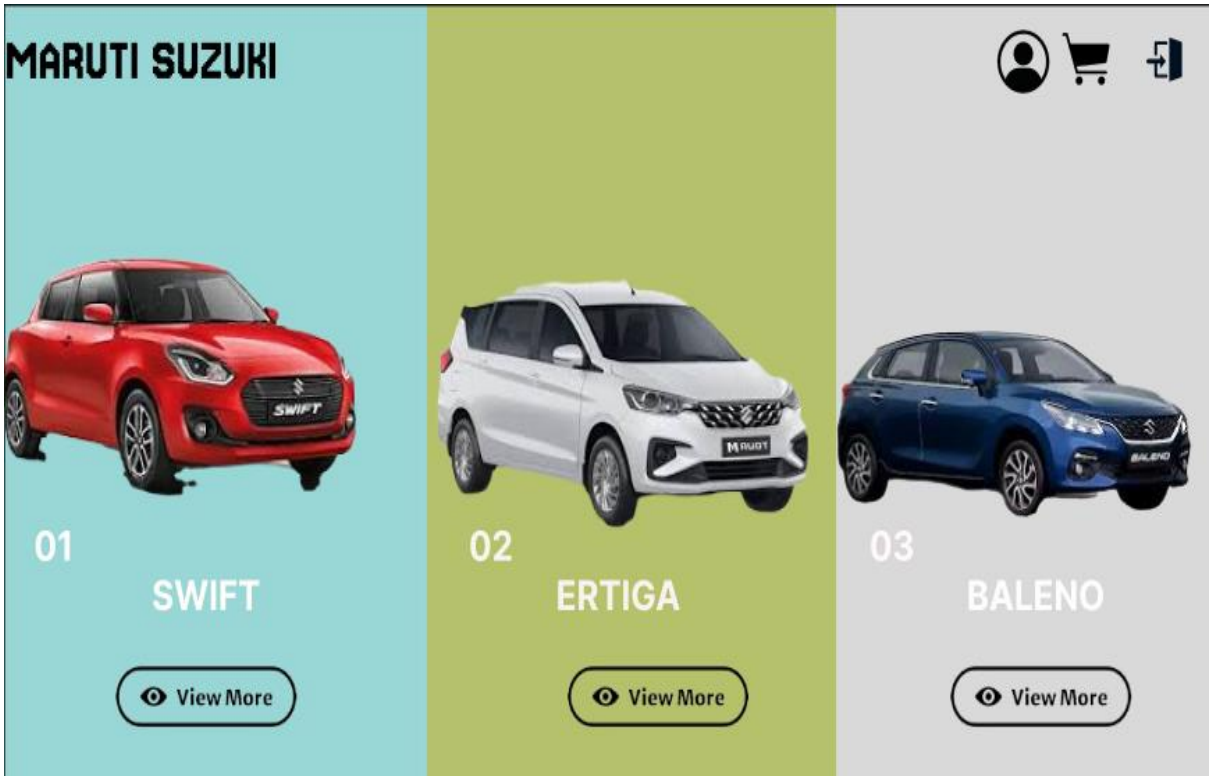
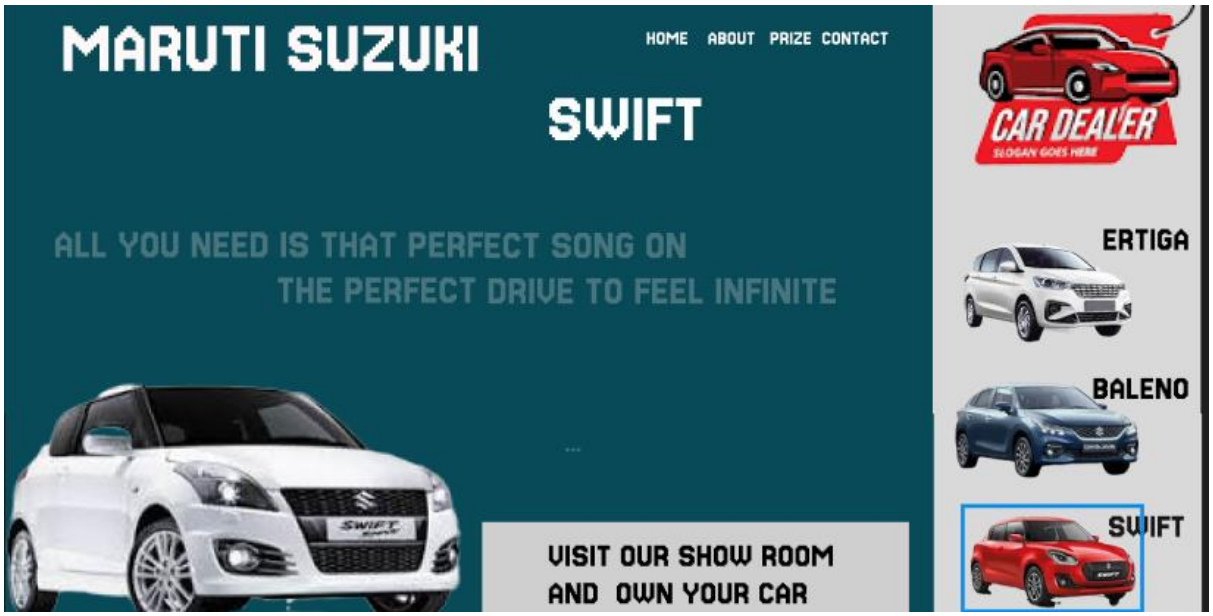
USER INTERFACE AND DESIGN

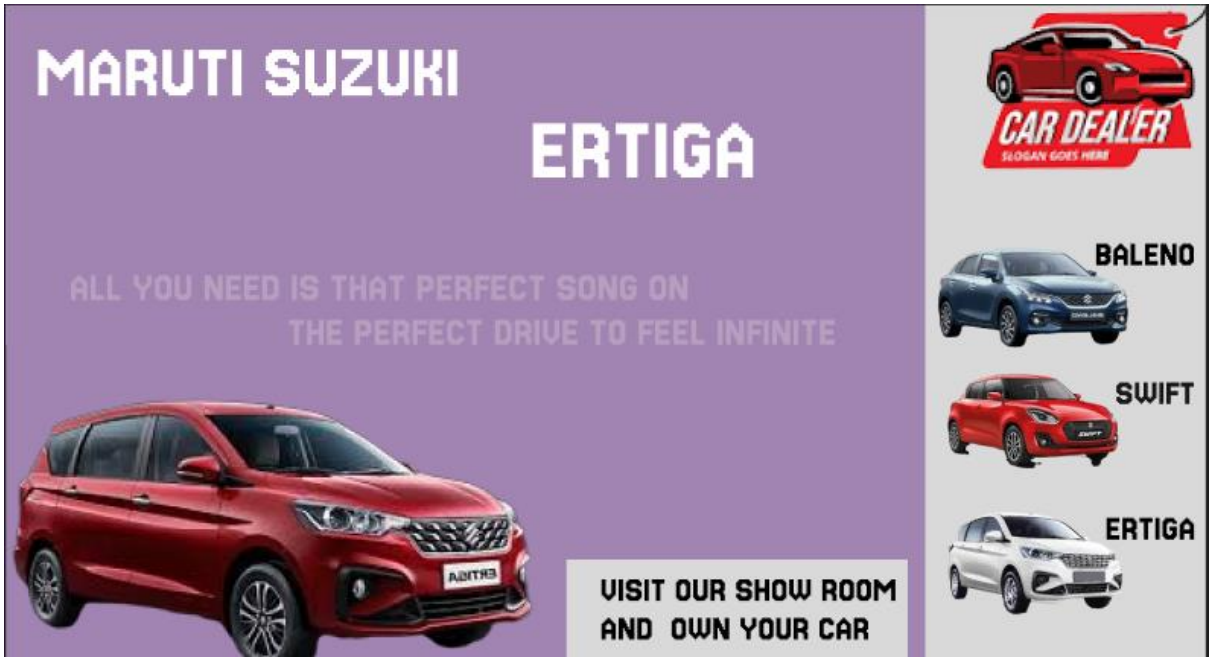
COMPARISON OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE:



GOOD WEBSITE





PROTOTYPE LINK

https://www.figma.com/proto/iky0Bxn4juJUNUAo5fym9n/Untitled?node-id=0-1&t=KO5CW30Oru5JXsWa-1

BAD WEBSITE

1.DESIGN STYLE:

- Uses bright background colours for each car section, but the layout looks flat and repetitive. The design lacks visual hierarchy and consistency.

2.LAYOUT & STRUCTURE:

- All car cards are placed side by side with minimal spacing. There is no clear focus area, making the interface look cluttered.

3.NAVIGATION:

- Navigation options are limited and represented only with icons, which may confuse users.

4.PURPOSE:

- Mainly suitable for basic product listing.

GOOD WEBSITE:

1.DESIGN STYLE:

- Uses a structured and professional layout with gradients and balanced colours. Each section looks visually appealing and well-organized.

2.LAYOUT & STRUCTURE:

- Follows a proper layout with a main content area and side navigation. Important elements like car image and text are well aligned.

3.NAVIGATION:

- Includes clear navigation links such as Home, About, Price, and Contact, making it more user-friendly.

4.PURPOSE:

- Designed for branding, marketing, and creating a strong connection with users.

KEY DIFFERENCES

- **Focus:**
  The bad website focuses only on displaying cars, whereas the good website focuses on user engagement and branding.
- **Design Quality:**
  The bad website has a simple and repetitive design, while the good website has a professional and visually appealing layout.
- **Content Depth:**
  The bad website shows minimal information, whereas the good website includes descriptive text and promotional content.
- **User Experience:**
  The bad website offers basic usability, while the good website provides a smooth and interactive user experience.
